Titan: Warehouse Management System

The Titan distribution and Warehouse Management System is a high-end solution designed to improve efficiency, customer service and profit levels for today's distributor. Provides automated accounting, distribution and sales processes from quotation through shipment of goods.

The system comprises the following fully integrated modules:

- Inventory Management
- Order Processing
- Purchasing
- Service and Repair
- Counter Sale

Titan supports Gordon Graham inventory management theories as an option. Modules support bar code and EDI. Strong multi-company, multi-warehouse consolidation. Spanish language version available. The Titan Distribution and Warehouse Management system is fully integrated with the family of Titan application modules.

Strong data retrieval capabilities and an integrated tool set add to the power of the application.

Utilizes the PROGRESS-4GL RDBMS technology. Source code available.
